Economies of scale in farms and environmental inequalities through the lenses of nitrogen fertilizer use: Concept development

Luciano B. Mendes
& Wilfried Winiwarter

N2016 – International Nitrogen Initiative

Melbourne, Dec. 4-8, 2016

IIASA, International Institute for Applied Systems Analysis

Motivation

Interest in technical options for emission abatement

- Some types of installations are applicable on large scales only
- Costs typically differ by size class
- Industrial farms: small number, large impacts

Statistics available for few world regions only

Causal loop approach
